ABARIS - ROPE BAG 31/38 LITRE

Durable 31/38 Litre Rope Bag with carry handle, carry strap and drawcord closure. This is by far the most popular rope access equipment bag with capacity for 100m of low-stretch/semi-static rope and some rigging gear, or for your complete rope access equipment. Available in two colours: blue and black.

Quantity: 1

Quantity: 100M - 328 Ft

ROPE ENGLISH BRAIDS

Tutus 11mm x 200m Low Stretch

Tutus static rope is an EN 1891 low stretch kermantel rope from English Braids. The ropes are of high strength for use in rope access, fall safety systems, rescue and caving.

The English Braids static ropes have a high proportion of sheath to cover ratio which provides improved abrasion protection and reduced sheath slippage. To ensure the product is of the highest standard they use high-quality yarns, the most modern of machinery and a stringent quality control process.

PETZL OXAN TRIPLE ACTION OVAL STEEL KARABINER

The Petzl Oxan is a high-strength steel carabiner designed for use in difficult environments. The oval, symmetrical shape allows optimal loading of the carabiner when setting up anchors or connecting to metal structures. It is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system. OXAN TRIACT-LOCK is available in European or international versions. OXAN can be connected to the CAPTIV bar to favor positioning of the carabiner along the major axis, to limit the risk of it flipping and to keep it integrated with the device.

PETZL – ANCHOR STROP PETZL WIRE STROP

6.5mm Galv Steel 23kN 1m

WIRE STROP is an anchor strap made of 6.5 mm diameter galvanized steel with two terminations of different sizes. It offers several configurations for setting up an anchor: directly to an anchor point or around a suitable structure. The plastic sleeve helps keep the connector in position and facilitates clipping. It is available in five lengths (50, 100, 150, 200 and 300 cm).

DMM K-PRO CANVAS

with Kevlar Edge Rope Protector 80cm

Made with 3 layers (2 external heavy duty canvas / 1 mid layer made from aramid) the K-Pro rope and edge protector can be used to protect rigging slings and where rigged ropes cross. The K-Pro can also be used to protect ropes from dirt or becoming contaminated with rust or heavy grease. The Aramid layer provides the following extra characteristics which differentiate this rope protector from its competitors:

- High strength.
- Resistance to absorption.
- Resistance to organic solvents, good chemical resistance.
- No conductivity.
- No melting point.
- Low flammability.
- Excellent heat and cut resistance.
- Sensitive to acids and ultraviolet radiation.
- 80cm Long.
- 70cm tie cords for double security.
- Aramid (Kevlar equivalent) Layer.
- Peep hole shows Aramid barrier.
