

BASIC ROPE ACCESS SETUP

- **TWO ROPES:** A worker is always connected to two ropes, which are independently attached to two anchors. There is always a backup.
- **BACKUPS:** Are used on the backup rope to connect the technician to their second backup rope.
- **ASCENDERS:** Are used to help the technician climb up to the two ropes. Changing between ascenders and descenders makes it easy to go up and down around a difficult location.
- **DESCENDERS:** These help the technician move down the set of two ropes.
- **HARNESS:** A full-body harness is worn to connect the worker to the two ropes.
- **LANYARDS & CARABINERS:** All devices such as backups, ascenders and descenders are connected to the harness via lanyards and carabiners to ensure nothing falls out or off.

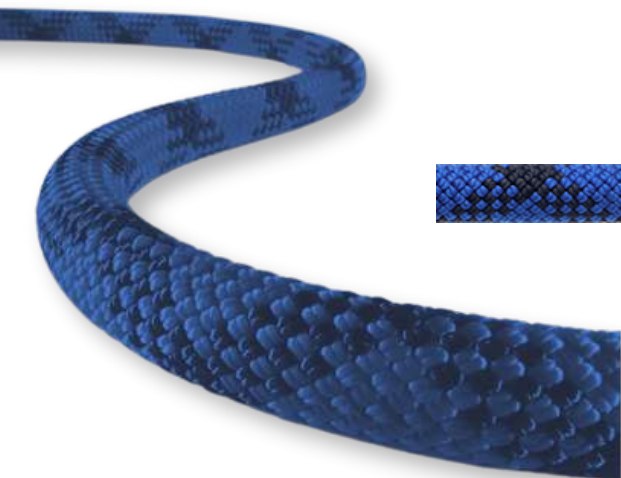

ROPE ACCESS EQUIPMENT - BASIC

PETZL - BUCKET ROPE BAG (30 L)

BUCKET 30 rope bag allows you to store up to 110 meters of 11 mm diameter rope. It remains upright and keeps its shape, even when empty, for easy access to the inside of the bag. It has padded shoulder straps for comfort, an exterior pocket to store personal items, and a marking area for quick identification of the contents of the bag. Its construction of TPU tarp material allows regular to intensive use. Available in three colors: yellow, red, and black.

Quantity: 1

TEUFELBERGER DYNAFLEX

Rope 11.3mm - Blue/Black - Per metre

Dynaflex is a dynamic rope that is designed to withstand a relatively high number of falls. It is provided with a 40-or 48-plait cover whose close weave protects the nylon cores within from contamination.

The highly twined yarns increase the abrasion resistance of the rope, and the regular pattern in the cover makes Dynaflex very grippy and convenient to use. All these characteristics make it the perfect rope for use under extreme conditions and for Cow's Tails in rope access.

Quantity: 5 Metre or 16 Ft

PETZL OXAN TRIPLE ACTION OVAL STEEL KARABINER

The Petzl Oxan is a high-strength steel carabiner designed for use in difficult environments. The oval, symmetrical shape allows optimal loading of the carabiner when setting up anchors or connecting to metal structures. It is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system. OXAN TRIACT-LOCK is available in European or international versions. OXAN can be connected to the CAPTIV bar to favor positioning of the carabiner along the major axis, to limit the risk of it flipping and to keep it integrated with the device.

Quantity: 10

Quantity: 1

PETZL ASAP LOCK

The ASAP LOCK mobile fall arrester is designed to facilitate handling during rope ascents. In normal use, the device moves freely along the rope without any manual intervention and follows the user in all his/her movements. In the event of a shock load or sudden acceleration, the fall arrester locks on the rope and stops the user. The integrated locking function allows the user to immobilize the device in order to reduce the potential fall distance. The connection arm makes the system drop-resistant when passing intermediate anchors.

PETZL ASAP'SORBER AXESS

The ASAP'SORBER AXESS energy absorber may only be used with the ASAP or ASAP LOCK mobile fall arrester. It allows user to work at a distance from the rope, in order to protect it during certain work phases. Equipped with tear-webbing inside a pouch that opens on each end, the absorber is protected from abrasion, while allowing for regular inspection. It can be used in two-person rescue situations for a maximum load of 250 kg.

PETZL EXPRESS SEWN SLING SHORT LINK

Quickdraw Extender 11cm

The EXPRESS quickdraw sling is perfect for working a route. The ergonomic shape makes it easier to grab. The STRING helps stabilize the carabiner when clipping and protect the carabiner attachment loop from wear. It is available in three lengths (11, 17, and 25 cm) to adapt to different uses and better manage rope drag.

PETZL HAND ASCENSION RIGHT HANDED

The ASCENSION handled ascender is designed for rope ascents and features an overmolded handle and ergonomic top section for a comfortable and powerful grip when pulling with one or two hands. The ASCENSION handled ascender has a large lower hole to easily attach two carabiners for a lanyard and foot loop.

PETZL ASTRO INTERNATIONAL ROPE ACCESS HARNESS

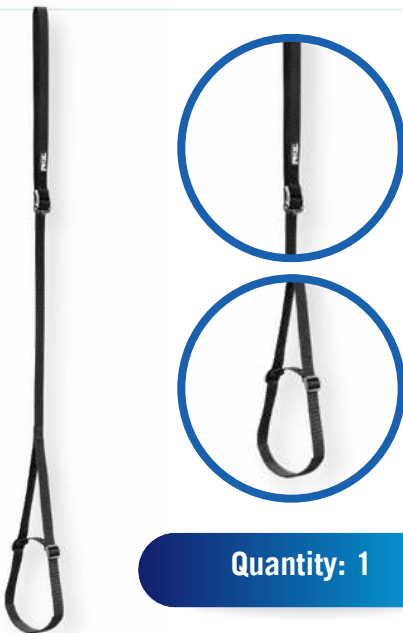

Ultra-comfortable rope access harness - Sizes 0,1,2

The ASTRO BOD FAST harness, featuring an integrated CROLL L ventral rope clamp, is engineered to optimize efficiency and comfort during rope ascents. With a gated ventral attachment point, it seamlessly integrates equipment like rope clamps or seats.

It's wide waistbelt and contoured leg loops provide exceptional support and comfort, while DOUBLEBACK self-locking buckles allow for quick adjustments. With multiple gear loops and slots for work tools, it offers enhanced utility and safety, meeting North American and European standards. The international version includes leg loops with FAST buckles for added convenience.

PETZL FOOTAPE ADJUSTABLE

Webbing Footloop

The adjustable FOOTAPE foot loop is used with an ASCENSION or BASIC rope clamp for rope ascents. A height adjustable elastic keeps the foot in the loop, regardless of shoe type.

PETZL PODIUM SEAT

Seat designed for prolonged suspension

The PODIUM provides optimal comfort during prolonged suspension. The wide sitting position offers excellent stability. Rigid sides prevent the webbing straps from cutting into the thighs. The easy-to-use seat has two equipment loops and a rear hook, making it easier to store in order to facilitate movement.

Quantity: 1

PETZL VERTEX HELMET WHITE

Offers exceptional comfort and security with its six-point textile suspension and CENTERFIT and FLIP and FIT systems. Its adjustable-strength chinstrap suits various work environments. The unventilated outer shell provides protection against electrical hazards, molten metal splash, and flames. Featuring integration capabilities for Petzl headlamps, face shields, hearing protection, and other accessories, it's a versatile choice meeting the diverse needs of professionals.

SHACKLES FOR CONNECTING A SEAT

Pack of 2

Connection to a gated attachment point on harnesses ensures optimal integration of equipment.

PETZL ID DESCENDER

Self-braking descender with anti-panic function

The self-braking I'D S descender is tailored for work at height and rope access tasks, featuring an ergonomic handle for comfortable descent control. Its integrated anti-panic function and anti-error catch minimize accidents caused by user error.

The AUTO-LOCK system enables easy positioning at a workstation without handle manipulation, and the safety gate facilitates rope installation while keeping the device connected to the harness. Compatible with 10 to 11.5 mm ropes, the I'D S handles loads up to 250 kg.

S-TEC DUCK

The S-TEC Duck R is an industrial rope access backup device meeting EN 12841 Type A standards and tested for a two-person rescue load. Crafted from stainless steel with an aluminum rocker arm, it's easily mountable on the rope.

Designed as a robust backup device for rope access environments, it surpasses the durability of an aluminum Shunt, originally designed for sports and unsuitable for work use. Tested for 200kg loads, S-Tech approves its usage accordingly. Refer to the Safe Tec Duck R Data Sheet for comprehensive details.
